Abstract—This document is a model and instructions for \LaTeX . This and the `IEEEtran.cls` file define the components of your paper [title, text, heads, etc.]. ***CRITICAL: Do Not Use Symbols, Special Characters, Footnotes, or Math in Paper Title or Abstract.**

Index Terms—component, formatting, style, styling, insert

I. INTRODUCTION

To simulate both mobility and energy use, realistic modeling of the weather is necessary. In this paper, you will need to investigate ways in which we can do this. Consider the effect of the position of the virtual city, seasons, and the ability to represent specific phenomena (storms, snow, heat waves).

II. TOPICS

A. *STEP (short-term ensemble prediction system) computation algorithm*

B. *ClimaX*

C. *GraphCast*

D. *Openweather API*

E. *Conclusion*

F. *References*

ACKNOWLEDGMENT

The preferred spelling of the word “acknowledgment” in America is without an “e” after the “g”. Avoid the stilted expression “one of us (R. B. G.) thanks ...”. Instead, try “R. B. G. thanks...”. Put sponsor acknowledgments in the unnumbered footnote on the first page.
